

HEATED SPATULA CTS ARTIST II

An indispensable instrument in all restoration workshops of paintings, both on canvas and on panel, paper and wood. It makes the sticking and relining much easier thanks to its special heated spatulas (the tips can have various shapes and sizes) which are heated to the most suitable temperature.

- The Heated Spatula **CTS ARTIST II** is made up of:
- an electronic control unit with digital temperature adjustment from 25 to 380°C approx. (UP/DOWN push buttons), a display showing the selected temperature and the actual temperature of the tip (SET push button), with the Celsius or Fahrenheit scale (C/F push button), a handle connection and a rear panel with starting button, power supply connection and fuses;
 - a handle with tip-holding stylus, built-in probe and connection cable to the control unit, 1 m long;
 - a handle stand placed on the control unit;
 - set of 4 tips in chromium-plated copper with double thickness and screw joint for handle:
 - n. 1 leaf shaped tip dim. 22 x 50 mm, Art. 1
 - n. 1 button tip, diameter 4 mm, Art. 5
 - n. 1 leaf shaped tip, dim. 20 x 63 mm, Art. 18
 - n. 1 plate tip, dim. 10 x 50 mm, Art. 21
 - a small hard case in polypropylene size 432x315x110 mm

TEHCNICAL SPECIFICATIONS:

Power supply:	230V - 50Hz single-phase
Power consumption:	48W
Handle:	24V - 50W
Temperature range:	approx. from 25°C to 380°C
Size of the control unit:	250x200x110 mm
Total weight of case and accessories:	2.95 kg
