

## PER-XIL 10

### WOODWORM DESTROYER

**Per-Xil 10** is a wood preservative for the elimination of woodworm, colourless, efficacious against the attack of xilophagous insects, with a contemporaneous preventive action.

**Per-Xil 10** can be successfully used for all wooden works, attacked by insects, placed on both the outside and the inside (beams, trusses, furniture, frames, wooden statues, panels, various wooden objects).

**Per-Xil 10** is a ready-to-use woodworm destroyer of extremely low toxicity, based on permethrin and piperonyl butoxide formulated with a special hydrocarbonic solvent, odourless, with high boiling and flash point; its particular formulation allows an excellent penetration of the active principle into the treated wood.

**Per-Xil 10** can be applied by brush, spray, injection, immersion or vacuum impregnation.

### PHYSICAL AND CHEMICAL PROPERTIES

• Composition:	Permethrin – 0.40% Piperonyl Butoxide – 0.06%
• Appearance:	colourless liquid
• Density:	0.80 kg/l at 20 °C
• Flash point:	59 °C
• Boiling point (range):	>175 °C

PACKAGE: 1 l | 5 l | 25 l

**Per-Xil 10** is a medical surgical device, registration no. 18496 of the Ministry of Health.
